

COMPANY QUALITY POLICY

The company policy is to produce all services and work for our clients to the highest standard possible, including meeting regulatory requirements, with the aim of being 100% correct the first time. Where our own standards differ from the clients, the client's standards over-ride.

We establish and review objectives from time to time and are committed to maintaining, reviewing and continually improving our Quality Management System, in conjunction with our UKAS accredited registration to BS EN ISO 9001: 2008.

It is the responsibility of all staff to understand, conform and contribute to the requirements of this policy and its associated working practices.

Signed
